

Credit Name: CSE 2nd Language Programming Credit  
Assignment Name: #12 Spending Assignment

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

The errors I've encountered in this assignment was inputting the values into the variables incorrectly and what caused this error was using "int" instead of double and how I overcame this error is searching it up on google on what variable it was suited to input these values from the user and it resulted in using "double" instead of using "int" since i'm using "scanner.nextDouble()";

```
// Prompting the user for their spends in different categories (food, clothing, e
System.out.print("Amount spent on Food (in USD): ");
int foodSpending = scanner.nextDouble();

System.out.print("Amount spent on Clothing (in USD): ");
int clothingSpending = scanner.nextDouble();

System.out.print("Amount spent on Entertainment (in USD): ");
int entertainmentSpending = scanner.nextDouble();

System.out.print("Amount spent on Rent (in USD): ");
int rentSpending = scanner.nextDouble();
```
