

Instructions:

1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	EX6 - MathTutor	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will input the answer to the following prompt. Example: "What is 2*5?= "	The program will randomly generate two numbers 1 through 10 and an operator (*,+,-,/). When the user inputs their answer it'll check the answer if it's correct or incorrect.	The output will display the question letting the user input the answer and once that's gone through the program, it'll display if the answer is correct or not. Example: "What is 2*5?= 10 Correct"
