

Credit Name: CSE 2nd Language Programming Credit
Assignment Name: PrimeNumber Assignment

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

The errors that I've encountered while working on this assignment is a simple syntax error in the function and what caused the error was missing an opening brace "{". I overcame this error by simply searching it on google the format of this function and noticed that I had missed a "{" and simply corrected the function after the realization.

```
// Function and conditions to check if a number is prime. Basically double checking.  
public static boolean isPrimeNumber(int n){
```
