

### **Instructions:**

1. Click on File -> Make a copy

**Include your IPO Chart with your code in Eclipse IDE:** We will discuss and demonstrate this in the computer lab.

## **IPO CHART**

<b>Program name:</b>	<b>EX10 - Order</b>	
<b>INPUT</b>	<b>PROCESS</b>	<b>OUTPUT</b>
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will input in the program how many fries, sodas, and burgers.	<p>After the Order is taken from the user it'll calculate the amount with tax of 6.5% and get the final cost.</p> <p>The program will also modify the order so the employee knows the amount tendered and the change due.</p>	<p>The applications will prompt the cost of burgers(\$1.69), fries (\$1.09), and sodas (\$0.99).</p> <p>It'll also display the final cost of the user's order and prompt the employee for the amount tendered and then display the change.</p>
